

# How to review event-generated videos

## What is an event-generated video?

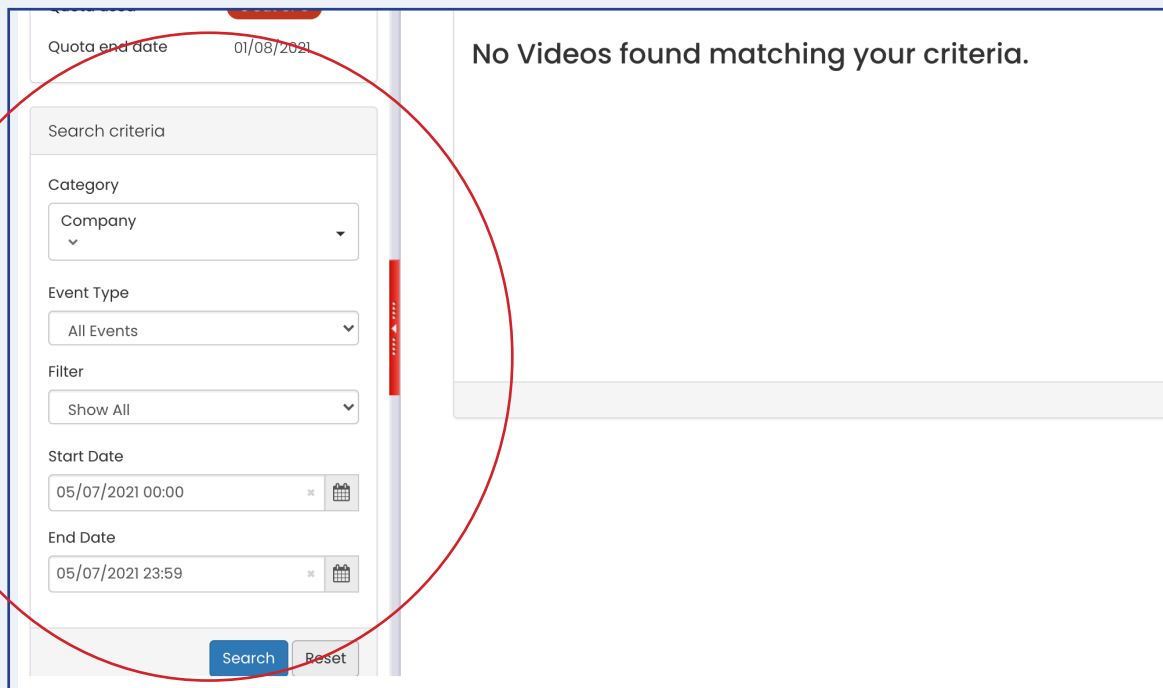

Crystal Ball's SmartCam solution automatically uploads event-generated footage to the SmartCloud when the onboard accelerometer detects a significant change in G-force. The system will then categorise the event-generated footage based on how severe the incident was.

1

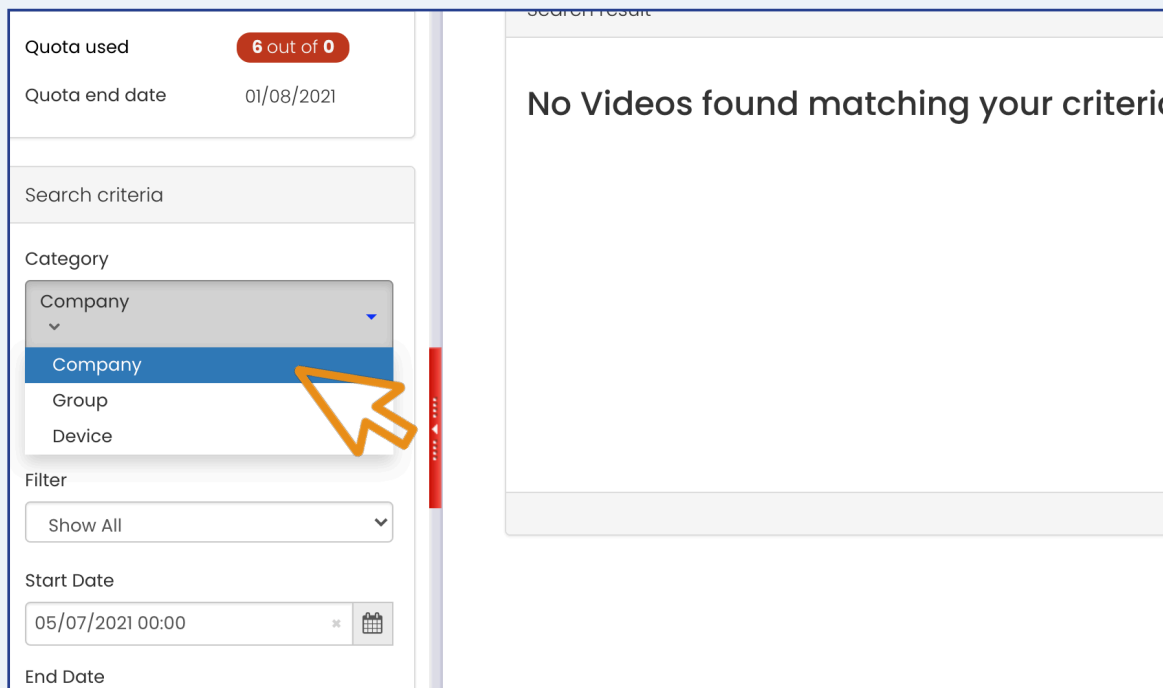

First, select 'Videos'.

# 2

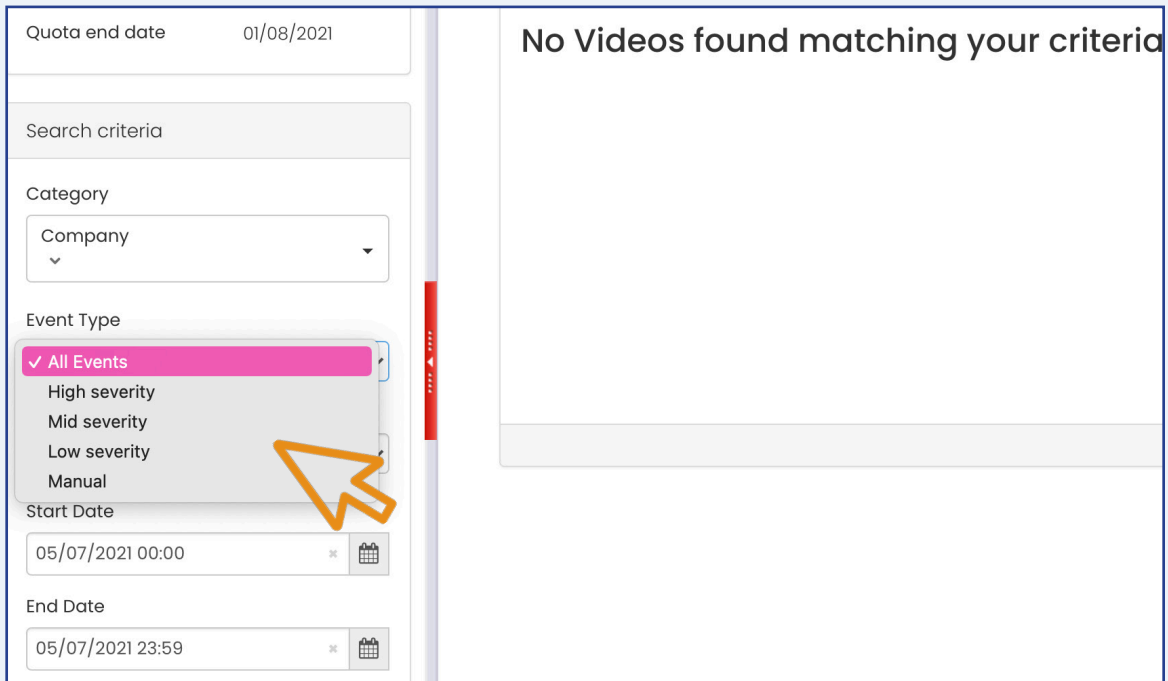

A list of filters for your search criteria will appear down the left hand side, the system will default to todays date.

# 3

You can select the 'Category' as either 'Company, Group or Device'.

Search Reset

You can also filter videos based on whether they are 'New' or 'Flagged' videos.

Finally, select the period of time from which you wish to retrieve videos using the 'Start Date/ End Date' and click 'Search'.

Please note, videos can only be viewed up to 12 weeks.
