- First, name the alarm
- You can choose whether you would like to activate the alarm when; 'the total idle time per journey exceeds x number of minutes' or 'a single idle event exceeds x number of minutes'. You must then enter a value in the 'exceeds x minutes' field - this will be the trigger to activate the alarm.
- Tick the 'analytics' checkbox if you want triggered alarms to display when using the analytics feature (More > analytics).
- You can also add a brief message for display, upon activation of the alarm.
- Select a recipient/s from the list (if the recipient is not listed go to step 5).
- Select a vehicle/s from the right hand side and create a schedule if you would like the alarm to be triggered at certain times/days. This can be left blank if you require the alarm to be triggered at all times.
- Click 'Save Changes'.
